

SQGDP1 Gross Domestic Product (GDP) summary, quarterly by state

Real Gross Domestic Product (GDP) (Compound annual growth rate between any two periods)

State or DC

GeoFips	GeoName	2019:Q4-2021:Q1
17000	Illinois	-0.5
18000	Indiana	0.4
26000	Michigan	-2.0
39000	Ohio	-0.7
55000	Wisconsin	-1.2

Legend / Footnotes:

Real GDP is in millions of chained 2012 dollars. Calculations are performed on unrounded data. Chained (2012) dollar series are calculated as the product of the chain-type quantity index and the 2012 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For the All industry total and Government and government enterprises, the difference between the United States and sum-of-states reflects overseas activity, economic activity taking place outside the borders of the United States by the military and associated federal civilian support staff.
